18th century-inspired equation of time cards.

The equation of time given for the 10th, 20th, and 30th of the month.
"Watch Faster" means that if one were to set a watch to mean time using a sundial, the watch *should be* X minutes faster than solar time.
Watch Faster = add.
Watch Slower = subtract.

Certain outlying days don't match their block's pattern of addition or subtraction. The flipped signs of these values are indicated with a + or -
